DETAILED ACTION

Allowable Subject Matter

Claims 1-4 and 6 are allowed.

The following is an examiner's statement of reasons for allowance: Richards (US Patent 6056579) discloses a modularized circuit board mounting architecture for mounting a modularized circuit board to an enclosure, with a handle-equipped locking member (Fig.1, element 58) which is formed with an elongated elastic portion (Fig. 1, element 58, col.2, lines 36-42) and a handle portion (Fig. 1) securely attached to one edge of a substrate (Fig.1). Richards does not teach nor is it obvious to make the handle ring shaped wherein it is pulled to release the elastic portion from the locking hole as in the claimed invention. Tanzer (US Patent 6636422) teaches a ring shaped handle (Fig. 1, element 110) used in a carrier for a data storage device, but does not teach a middle section hook portion and a rear end press on portion, further more there is no evidence making obvious combining the ring shaped handle taught by Tanzer to the modularized circuit board mounting architecture, taught by Richards.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
